

# SODIUM THIOSULPHATE LIQUID

Liquid for de-chlorinating ballast water prior to discharging into the sea.

## FEATURES & BENEFITS

- Neutralises chlorinated ballast water
- Easy to use
- For use in electrolysis ballast water treatment systems

### PRODUCT DESCRIPTION

SODIUM THIOSULPHATE LIQUID is a 30% solution of sodium thiosulphate (also: a solution of sodium thiosulphate pentahydrate 50%). It is used in ballast water treatment systems that work through electrolysis and use sodium hypochlorite as a disinfectant. SODIUM THIOSULPHATE LIQUID works as a neutralising agent, de-chlorinating the ballast water prior to discharging into the sea.

### DIRECTIONS FOR USE

Use SODIUM THIOSULPHATE LIQUID according to the directions provided by the manufacturer of the ballast water treatment system.

### STANDARD PACKING

SODIUM THIOSULPHATE LIQUID is usually available in plastic cans of 25 l and plastic drums of 200 l.

For product characteristics and for the nature of special risks and safety advice consult our MSDS.
