

WATER FINDER SPECIAL

For water detection in gasoline and diesel fuel tanks.

FEATURES & BENEFITS

- Fast and simple water detection
- Results instantly visible due to colour change
- Economical in use
- The paste adheres well to the dipstick
- Also works in the presence of methanol or tertiary butanol
- The paste contains no toxic or environmentally harmful ingredients

APPLICATIONS

WATER FINDER SPECIAL changes colour from dark green to navy blue when it comes into contact with water present under fuel or mineral oils. Water can cause significant corrosion in storage tanks and other devices. It is therefore extremely important to regularly check for the presence of water.

DIRECTIONS FOR USE

Apply the paste to the bottom of the dipstick and lower it to the bottom of the tank. Once the dipstick has been raised again, presence of water is instantly visible as the paste will have turned navy blue.

STANDARD PACKING

WATER FINDER SPECIAL is usually available in boxes containing 20 tubes of 70 gram.
