Depending on the concentration and duration of exposure, MEA causes severe irritation or even burns on all contacted mucous membranes and also on the skin, which can occur with a certain delay.

Symptoms of acute poisoning:

Eyes: Conjunctivitis up to damage to the cornea.

Skin: irritation, swelling; chemical burns possible with prolonged exposure to the undiluted substance; sensitization Inhalation: irritation of the airways up to toxic pulmonary edema; even at lower concentrations, pulmonary dysfunction cannot be ruled out: Resorptive effects can occur relatively quickly

Ingestion: (only experience from animal experiments): irritation to damage to mucous membranes that have been contacted; systemic effects

Absorption (only in animal experiments): loss of muscle tone; sedation, dyspnoea, convulsions, damage to blood vessels; Functional changes up to damage to various organs (especially liver, kidneys, lungs).
