

SODIUM THIOSULPHATE PENTAHYDRATE

Powder for de-chlorinating ballast water prior to discharging into the sea.

FEATURES & BENEFITS

- Neutralises chlorinated ballast water
- Easy to use
- For use in electrolysis ballast water treatment systems

PRODUCT DESCRIPTION

SODIUM THIOSULPHATE PENTAHYDRATE is a clear crystalline powder that dissolves well in water. It is used in ballast water treatment systems that work through electrolysis and use sodium hypochlorite as a disinfectant. SODIUM THIOSULPHATE PENTAHYDRATE works as a neutralising agent, de-chlorinating the ballast water prior to discharging into the sea.

DIRECTIONS FOR USE

Use SODIUM THIOSULPHATE HYDRATE according to the directions provided by the manufacturer of the ballast water treatment system.

STANDARD PACKING

SODIUM THIOSULPHATE PENTAHYDRATE is usually available in bags of 25 kg.
